

Stainless Steel Angles

Custom Angle - 304 Stainless #4 Finish

304 stainless steel custom angle #4 finish is the brushed finish commonly seen on kitchen appliances and backsplashes. The 304 stainless steel custom angle #4 finish has a PVC film on one side to help protect against scratching during fabrication and installation. Our 304 stainless steel custom angle #4 finish meets the criteria for both the #3 and #4 finish.

Custom Angle - 304 Stainless #8 Mirror

304 stainless steel custom angle #8 mirror has a non-directional finish that virtually looks like a mirror. 304 stainless steel custom angle #8 mirror possesses a highly polished finish and does not contain or have a coating or finishing material to give it reflectivity. 304 stainless steel custom angle #8 mirror comes with a double layer of PVC film to protect the mirror finish during fabrication and installation.

Custom Angle - 304 Stainless 2B Finish

304 stainless steel custom angle 2B finish is a mill finish, which is smooth and NOT the brushed finish commonly seen on kitchen appliances. 304 stainless steel custom angle 2B finish is light gray in color. 304 stainless steel custom angle 2B finish may or may not have a protective film on one side to prevent scratching.

Custom Angle - 316L Stainless 2B Finish

316L stainless steel custom angle 2B finish has a mill finish, which is smooth and NOT the brushed finish commonly seen on kitchen appliances. Our 316L stainless steel custom angle 2B finish will not have a protective film to prevent scratching, so the 316L stainless custom angle will commonly have scratching.

Custom Angle - 430 Stainless #4 Finish

430 stainless steel custom angle #4 finish is the brushed finish commonly seen on kitchen appliances and backsplashes. 430 Stainless Steel custom angle #4 finish has a PVC film on one side to help protect against scratching during fabrication and installation. Our 430 stainless steel custom angle metal meets the criteria for both the #3 and #4 finish.

Custom C-Channel - 304 Stainless #4 Finish

304 stainless steel custom C-Channel #4 finish is the brushed finish commonly seen on kitchen appliances and backsplashes. The 304 stainless steel custom C-Channel #4 finish has a PVC film on one side to help protect against scratching during fabrication and installation. Our 304 stainless steel custom C-Channel #4 finish meets the criteria for both the #3 and #4 finish.

Custom C-Channel - 304 Stainless #8 Mirror

304 stainless steel custom C-Channel #8 mirror has a non-directional finish that virtually looks like a mirror. 304 stainless steel custom C-Channel #8 mirror possesses a highly polished finish and does not contain or have a coating or finishing material to give it reflectivity. 304 stainless steel custom C-Channel #8 mirror comes with a double layer of PVC film to protect the mirror finish during fabrication and installation.

Custom C-Channel - 304 Stainless 2B Finish

304 stainless steel custom C-Channel 2B finish is a mill finish, which is smooth and NOT the brushed finish commonly seen on kitchen appliances. 304 stainless steel custom C-Channel 2B finish is light gray in color. 304 stainless steel custom C-Channel 2B finish may or may not have a protective film on one side to prevent scratching.

Custom C-Channel - 316L Stainless 2B Finish

316L stainless steel custom C-Channel 2B finish has a mill finish, which is smooth and NOT the brushed finish commonly seen on kitchen appliances. Our 316L stainless steel custom C-Channel 2B finish will not have a protective film to prevent scratching, so the 316L stainless custom C-Channel will commonly have scratching.

Custom C-Channel - 430 Stainless #4 Finish

430 stainless steel custom C-Channel #4 finish is the brushed finish commonly seen on kitchen appliances and backsplashes. 430 Stainless Steel custom C-Channel #4 finish has a PVC film on one side to help protect against scratching during fabrication and installation. Our 430 stainless steel custom C-Channel metal meets the criteria for both the #3 and #4 finish.

Custom Z-Channel - 304 Stainless #4 Finish

304 stainless steel custom Z-Channel #4 finish is the brushed finish commonly seen on kitchen appliances and backsplashes. The 304 stainless steel custom Z-Channel #4 finish has a PVC film on one side to help protect against scratching during fabrication and installation. Our 304 stainless steel custom Z-Channel #4 finish meets the criteria for both the #3 and #4 finish.

Custom Z-Channel - 304 Stainless #8 Mirror

304 stainless steel custom Z-Channel #8 mirror has a non-directional finish that virtually looks like a mirror. 304 stainless steel custom Z-Channel #8 mirror possesses a highly polished finish and does not contain or have a coating or finishing material to give it reflectivity. 304 stainless steel custom Z-Channel #8 mirror comes with a double layer of PVC film to protect the mirror finish during fabrication and installation.

Custom Z-Channel - 304 Stainless 2B Finish

304 stainless steel custom Z-Channel 2B finish is a mill finish, which is smooth and NOT the brushed finish commonly seen on kitchen appliances. 304 stainless steel custom Z-Channel 2B finish is light gray in color. 304 stainless steel custom Z-Channel 2B finish may or may not have a protective film on one side to prevent scratching.

Custom Z-Channel - 316L Stainless 2B Finish

316L stainless steel custom Z-Channel 2B finish has a mill finish, which is smooth and NOT the brushed finish commonly seen on kitchen appliances. Our 316L stainless steel custom Z-Channel 2B finish will not have a protective film to prevent scratching, so the 316L stainless custom Z-Channel will commonly have scratching.

Custom Z-Channel - 430 Stainless #4 Finish

430 stainless steel custom Z-Channel #4 finish is the brushed finish commonly seen on kitchen appliances and backsplashes. 430 Stainless Steel custom Z-Channel #4 finish has a PVC film on one side to help protect against scratching during fabrication and installation. Our 430 stainless steel custom Z-Channel metal meets the criteria for both the #3 and #4 finish.

Custom Angle - 430 Stainless BA Finish

The 430 bright annealed custom angle (BA) finish is cold rolled stainless steel that is annealed in a controlled atmosphere to retain a highly reflective finish. Although it is not completely identical to the #8 mirror finish, it appears to be very similar. The 430 stainless steel custom angle bright annealed finish has a PVC film on one side to help protect against scratching during fabrication and installation.

Custom C-Channel - 430 Stainless BA Finish

The 430 bright annealed custom C-Channel (BA) finish is cold rolled stainless steel that is annealed in a controlled atmosphere to retain a highly reflective finish. Although it is not completely identical to the #8 mirror finish, it appears to be very similar. The 430 stainless steel custom C-Channel bright annealed finish has a PVC film on one side to help protect against scratching during fabrication and installation.

Custom Z-Channel - 430 Stainless BA Finish

The 430 bright annealed custom Z-Channel (BA) finish is cold rolled stainless steel that is annealed in a controlled atmosphere to retain a highly reflective finish. Although it is not completely identical to the #8 mirror finish, it appears to be very similar. The 430 stainless steel custom Z-Channel bright annealed finish has a PVC film on one side to help protect against scratching during fabrication and installation.

Custom Z-Channel - 304 Stainless BA Finish

The 304 bright annealed custom Z-Channel (BA) finish is cold rolled stainless steel that is annealed in a controlled atmosphere to retain a highly reflective finish. Although it is not completely identical to the #8 mirror finish, it appears to be very similar. The 304 stainless steel custom Z-Channel bright annealed finish has a PVC film on one side to help protect against scratching during fabrication and installation.

Custom Angle - 304 Stainless BA Finish
